

MOSQUITOES

2023 Mosquito Control

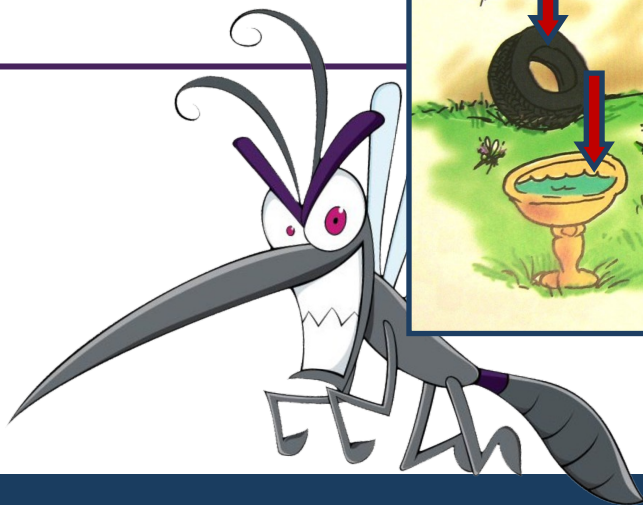

Our team has been out and about testing and treating for mosquito larva throughout TFN Lands since the first week of May.

Mosquitoes require only a few inches of still, standing water to reproduce. Please check your home and property carefully, and drain or cover all standing water in items such as:

- Backyard Sumps
- Tires
- Children's Toys
- Fish Totes
- Bird Baths
- Tarps
- Buckets
- Overwatered Grass

DID YOU KNOW...?

A single car tire holding just a little rainwater can produce thousands of Mosquitoes in one year.

If you have any questions or concerns about the work we are doing to manage mosquitoes on TFN Lands, or if you would like to request a survey of your land, please call or email the TFN Lands Department:
